DATASET ABSTRACT SUMMARY

Title:
Climate change impacts on southern Ross Sea phytoplankton composition, productivity and export

Authors:
Daniel E. Kaufman; Marjorie A. M. Friedrichs; Walker O. Smith Jr.; Eileen E. Hofmann; Michael S. Dinniman; John C. P. Hemmings

Orcid IDs:
0000-0002-1487-7298 (DEK); 0000-0003-2828-7595 (MAMF); 0000-0003-4304-1980 (WOS); 0000-0001-7519-9278 (MSD)

Location (place name):
Ross Sea, Antarctica

Location (bounding box coordinates):
78° S, 164° E;
75° N, 164° E;
75° S, 176° E;
78° S, 176° E

Date:
2017 January 20

Description of Data:
Contained within are model input/output files and data used in figures of the associated publication.

The contained files are in simple text and comma-separated formats. Model input/output files are in layouts associated with the Marine Model Optimization Testbed (MarMOT), an advanced open-source 1D model analysis framework. For information about MarMOT, its source code and input/output, see http://projects.noc.ac.uk/marmot/. For code relating to the Ross Sea version of the MEDUSA model (-RS) please contact the authors (dekaufman@vims.edu, marjy@vims.edu)
