Introduction

On March 16-17, 1981 approximately 32 U.S. firms exhibited an extensive range of U.S. food products at the U.S. Food Show in Cairo Egypt. This show, arranged by the U.S. Dept. of Agriculture, Foreign Agricultural Service presented a unique opportunity to display several fish species common to the Gulf and South Atlantic region suitable for export to Egypt.

Among the most popular fish and fish products were mullet, mullet roe, small flounder, scup (porgie), seatrout and bluefish. There was a significant amount of legitimate interest in the U.S. seafood presented by the Gulf and South Atlantic Fisheries Development Foundation, Fass Brothers, Inc. of Hampton and McRoberts Sales of Ruskin, Florida.

In addition to the Food Show, the exhibitors received a briefing on the Egyptian market by Dr. James Ross, Agricultural Attache, Dr. Aly Zein El Abdeen, United Company for Economic and Commercial Studies and Mr. Atif Abdel Hamid Ghaid, Asst. Comptroller of Imported Meats and Poultry. A common concern expressed by the exhibitors was the requirements for the inspection and shipment of food products exported to Egypt from the U.S. under Egyptian government tender offers. It is for this reason, two documents on inspection and shipping criteria are reproduced for this report.
Seafood Production and Consumption

The per capita quantity of seafood consumption had increased by 33% from 1963 - 1974. Presently, per capita consumption is approximately 12 lbs/year for the 42 million inhabitants. Domestic production of seafood was approximately 230 MT for 1979 while imports reached 78 MT. It is anticipated that domestic production will remain the same resulting in greater opportunities for imported products.

Species and Prices

Mullet and mullet roe were by far the most popular items displayed. Mullet is preferred whole ungutted or whole with roe. Additionally, good interest was shown in sea trout, bluefish and scup (porgie). All fish should be whole and ungutted unless otherwise specified. Size is an important consideration as scup should range from 17 - 25 cm with an average of 21 cm in total length. Sea trout and bluefish should range from 1-3 kilograms each. These specifications are completely negotiable depending upon the specific terms of letter of credit or a bill on a government tender. Prices on whole fish are negotiable, however there were some reluctant attitudes shown by buyers when prices exceeded U.S. $1000 - metric ton C & F (except for mullet with roe).
Public vs Private Sector

The private sector is very diversified with numerous trading companies and agents. As with all exporting ventures, care must be taken in selection of agents and/or trading companies. It is imperative that private sector businesses have freezer storage available. There are different opinions about obtaining an exclusive agent for export transactions. Some individuals claim that it is essential to have a good agent working in your behalf while others claim it can be done by dealing directly with the purchasing company.

The public sector programs under USAID and government tender offers are somewhat more straightforward. The specifications and requirements for tender offers are included in this report.

The private sector currently markets about 68% of the seafood domestically produced and imported. The goal of the public sector programs is to increase annual imports to 120,000 MT and promote a larger role for public sector retail outlets at fixed prices.

The status of the public sector programs are subject to frequent review and change. Interested parties should maintain contact with the Gulf and South Atlantic Fisheries Development Foundation.
A-1
Specifications and Conditions for Government Tender Offers

I. SPECIFICATIONS:
- Frozen Fish according the following types.

QUANTITIES: 10000 TONS.

TYPES AND QUANTITIES:
1. Sea Bream and or red fish (PAGRUS PAGRUS AND OR ANGYROPS SPINIFER)
   (whole round fish) min. length 22 cm each or 5 fish per Kg max...........3000
2. Sea Bream and or red Snapper (PAGRUS PAGRUS AND OR LUTJANUS SEBEA)
   (H+G) min. 350 gms and up.....................................................1500
3. Hake (MERLUCCIUS MERLUCCIUS) (whole round fish) min length 30 cm each..2000
4. Grey Mullet (MUGIL CEPHALUS) (whole round fish) 4 - 2 fish per Kilo.....500
5. Herring (CLUPEA HARENGUS) (whole round fish) min length 20 cm each.....500
6. Different Species: Drum (POGONIAS CROMIS), Sea trout (CYNOSCION REGALIS),
   Grouper (SERNA GIGAS), Croaker (MICROPOGON UNDALATUS) and Lady fish
   (ELOPS SARUS) (whole round fish) max. length 40 cms.....................2500

I. GENERAL SPECIFICATION:

NOTE: Samples to be provided must be 3 fishes min. of Submitted 10 days before
due date.

1. Fish should be in good condition, fresh appearance, solid, no damages,
natural colour and odour.

2. Fish should be well freezed according to up to date technical methods.

3. Fish should be clear of any Microbics Biological and Parasides against
   Human. stomach and flesh.

4. Fish should be clear of any Pathigenics, Toxins, Radiatics, Fertilizer
   Antiseptics.

5. Fish should be clean, self-integral, free from any rotten appearance, and
   of natural colour and smell keeping its natural condition.

18. All these conditions are in effect whether or not the contract has been signed.

VIII. It should be taken into consideration that delivery schedule should not be altered which shall be fixed and the bank will be officially informed with the shipping schedule.

In case any deviation in this schedule either advance or delayed without an accepted excuse, the company will have the right to confiscate the total value of the L/C.
IX. Prices will be fixed according to this tender and supplier is not allowed to supply any other types even with other prices.
ATTACHE REPORT

EGYPT: Decrees Pertaining to Inspection of Imported Frozen Meat, Poultry and Fish

Attached is an unofficial translation of the Deputy Prime Minister's Order No. 128 of 1981 concerning inspection of imported frozen meat, poultry and fish. The order establishes a "Frozen Foodstuffs Inspection Committee" and specifies committed assignments.

Also attached is a supplement to Order No. 128 of 1981. The supplement pertains to inspection of shipments and indicates the certificates and documents that should be included with each shipment. Details on the method of drawing samples make up the second part of the supplement. This section includes information on general rules, sample percentages, transportation of samples and laboratory tests.

A third attachment is Ministry of Health Decree No. 298 of 1980. The decree specifies tolerance levels for the presence of salmonella in red meat and poultry meat.

Attachments:

1. Order No. 128
2. Supplement to Order No. 128
3. Decree No. 298
Deputy Prime Minister's Order No. 128 of 1981

Concerning Inspection of Imported Foodstuffs
of Frozen Meat and Poultry As Well As Their Parts
In Addition to Frozen Fish

The Deputy Prime Minister

Considering the Constitution;

- And the Anti-fraud and deceit law No. 48 of 1941 and its amending laws;
- And the Control of Foodstuffs Law No. 10 of 1966 and its amending laws;
- And the Regulation of Meat Trade Decree issued in 1953 and its amendments;

It is Resolved:

Article 1: The Supply Ministry and its affiliated bodies shall advise the Ministries of Health and Agriculture as well as the Exports and Imports Control Authority of the date of arrival of shipments of frozen meat and poultry as well as their parts in addition to frozen fish, naming the port of destination well in advance of the date of arrival.

Article 2: A committee to be called "Frozen Foodstuffs Inspection Committee" shall be set up of representatives of the Ministries of Health, Agriculture and Supply as well as the Exports and Imports General, Control Authority and the Customs Department, each representative to be nominated by the relevant minister. The Committee set up shall be announced in virtue of an order to be issued by the Minister of State for Health or whoever he delegates.

The persons concerned or their delegates and the insurance companies' representatives may attend the Committee's deliberations.

Article 3: The Committee referred to in the preceding Article shall be entrusted with the following assignments:

- Carry out superficial inspection of imported frozen supply foodstuffs' shipments at the port of arrival, in accordance with the instructions adopted in this respect.

- Confirm the availability and soundness of the hygienic documents and certificates accompanying each shipment, as detailed in the supplement annexed to this Order.

- Draw samples of the shipment's contents, and supervise their dispatch to the analysis laboratories for carrying out the necessary tests in conformity with the terms and conditions set out in the supplement annexed to this Order.

- Draw up a report containing the superficial inspection carried out, and confirming the availability of the documents and the drawing of samples. The said report shall be signed by all the Committee's members.

Article 4: The Ministry of Health shall advise the quarters concerned the decision to be taken respecting the shipment following completion of the superficial inspection, the checking of the attached documents and preparation of the joint report of the outcome of all the laboratory tests. The said decision shall be considered final in respect of the shipment.

Article 5: In quarters concerned shall strictly adhere to the terms and conditions spelled out in the supplement annexed to this Order.

Article 6: The quarters concerned shall implement this Order and issue the necessary orders in conformity with the valid laws and regulations.

January 8, 1981
Dr. Fouad Mohieddin
Supplement to the Deputy Prime Minister's Order
No. 128 of 1981

Pertaining to Inspection of Shipments of
Imported Foodstuffs of Frozen Meat and Poultry
As Well As Their Parts In Addition to
Frozen Fish

---

First: The Certificates and Documents that should be Indicated
with Each Shipment

- Concerning frozen meat and poultry and their parts

(A) Date of slaughter according to the Moslem religion
including the date of slaughter.

(B) Certificate from the Competent Health Authorities
at the State of Origin, encompassing the following
information:

Exporting country - number of parcels - type of meat
- date of inspection - name of consignor - port of
dispatch - name of consignee.

(C) Certificate from the Veterinary Authority concerned
and accredited at the Country of Origin to the
effect that the animals from which the meat and its
parts are taken had been examined before and after their
slaughter, and found carrying no diseases contagious
to human beings or animals.

(D) Certificate attesting that the said meat had been kept
before their shipment below zero centigrade, and that
every piece had been wrapped up in clean muslin or the
like.

- Concerning Frozen Fish

(A) Certificate to the effect that fishing was not carried
out by explosives.

(B) Certificate testifying that fishing was carried out
at places not contaminated with radioactive
material or fertilizers or insecticides.

(C) Certificate showing the date of freezing, free from
poison and contagious diseases, and suitable for human
consumption.
Second: Mode of Drawing Samples

- General Rules:

(A) Accuracy and general cleanliness should be observed when drawing the required samples from the supply foodstuffs shipments subject of this Order to avert the occurrence of any contamination.

(B) Drawing samples during the unloading of consignments in a manner that samples represent the consignment's contents subject of testing, and in conformity with the instructions regulating this process.

(C) Samples should constitute complete units of the consignment subject of examination, and each unit should retain its original wrappings. No unit shall be subjected at any stage of its manipulation to mechanical tearing, and it shall be kept in the state of freezing as when it was received pending its delivery to laboratories.

(D) Drawn samples shall be divided into two similar parts: one to be examined at the central laboratories of the Ministry of Health in Cairo, and the other to be examined at the Animal Health Laboratories of the Ministry of Agriculture in Cairo.

- Samples Percentages:

(A) Regarding Frozen Meat and Its Parts

A complete unit shall be drawn of the frozen meat, each unit represents a sample, scale 1:2000 units up to the first ten thousands, and scale 1:5000 for exceeding this with a maximum of twelve units.

Frozen Beef:

The unit represents quarter of a slaughtered cow.

Frozen Mutton:

The unit represents a complete slaughtered sheep or its parts according to the condition in which it is received.

Boneless Meat Packed in Blocks:

The unit represents one block.
(B) Regarding Frozen Poultry and Their Parts

A complete unit (cardboard box) of the frozen poultry shall be drawn, and each cardboard box represents a sample, scale 1:500 unit for the first thousand, and 1:1000 for the following two thousands, and 1:5000 upon exceeding this, with a maximum of fifteen cardboard boxes.

(C) Concerning the Liver, Gizzard and Parts of Poultry

A packing is considered a cardboard box, and samples shall be drawn at the same scales previously mentioned regarding frozen poultry.

(D) Concerning Frozen Fish

A packing (cardboard box) is considered a sample, scale 1:2000 respecting the first four thousands, and 1:5000 upon exceeding this, with a maximum of ten cardboard boxes.

- Transportation of Samples

(A) Upon drawing up the report on the drawing of samples of Health and Agriculture delegates representing the Inspection Committee shall immediately transport them to the Central Laboratories and the Animal Hygiene Laboratories in Cairo, issuing a refrigerating motor vehicle suitable for maintaining the samples at freezing point to be provided by the Ministry of Supply respecting the samples drawn from shipments arriving for the State's Administrative Organ or the public sector. As regards the samples drawn from the shipments arriving for the private sector, the refrigerating motor vehicle shall be provided by the Ministry of Health.

(B) The samples' part to be examined at the Central Laboratories shall be delivered there to, and the identical other part shall be delivered to the Animal Hygiene Laboratories, in virtue of a report to include the time and date of delivering the samples.
Third: Laboratory Tests:

- The required laboratory tests shall be carried out, upon agreement between the Ministries of Health and Agriculture, at the two laboratories in accordance with the recognized scientific methods.

- A joint report shall be issued by the two laboratories of the outcome of examinations and tests to be signed by the responsible authorities of both laboratories, upon coordination of their work, and holding a common meeting should the need arise. 1/

- The joint report of the two laboratories shall be issued within 4-6 days for the negative samples, and within a maximum period of 15 days for the positive samples.

1/ According to administrative procedures, if one of the two laboratories rules the product unsatisfactory, this finding will become the determination of the joint report.
MINISTRY OF HEALTH

MINISTERIAL DECREE NO. 298, 1980

Upon perusal of Law No. 48, 1941 for food control and Law No. 685, 1954 for meat transportation and Law No. 10, 1966 for food handling and the Presidential Decree of April 2, 1953 for meat trade and the minutes of the meeting of the higher committee for control of communicable diseases on April 24, 1980 concerning salmonella and its effects on food commodities, especially meat and poultry, it was decided that:

Article 1. Laboratory examinations should be carried on samples of meat and poultry upon arrival to ports. Certificates issued by the country of origin should be taken into consideration.

Article 2. Samples representing each shipment should be obtained by food control officers and sent to the bacteriological laboratories as follows:

a. In cases of meat, 10 samples of at least 200 grams for each shipment.

b. In cases of poultry, 5 samples of one whole chicken from each shipment.

c. All regulations concerned with obtaining, carrying and delivery of samples should be carefully executed.

Article 3. (a) In cases of meat, the shipment will be considered suitable for human consumption if 10 percent of the samples contain salmonella.

(b) In cases of poultry, the shipment will be considered suitable for human consumption if 20 percent maximum of the samples show salmonella.

Article 4. For all concerned agencies to carry out.

Minister of Health

Dated May 5, 1980

P. Dr. Mamdouh Gabr

Unofficial translation by the Office of the Agricultural Attache, American Embassy, Cairo, June 11, 1980.
